\*\*Children under 5 years of age are restricted from group settings until cleared by the Public Health Department

\*\*\*If condition occurs in two or more children of the same class grouping

Parents, this is a list of communicable diseases and conditions for you to be aware of regarding when to keep your child home, when to contact the school, and what to be aware of. Also, it references what we are obligated to post and follow up on.  
 If your child has a communicable disease, we require a note from their doctor stating they are no longer contagious and able to return to school.
